

# ROGUE RIVER COURIER

GRANTS PASS, OREGON.

Published Every Thursday.

Subscription Rates: One Year, in Advance, \$1.25; Six Months, .75; Three Months, .50; Single Copies, .25.

Notice is hereby given that on July 1, 1902, the subscription rate of the COURIER will be raised to \$1.50 per year. Anybody who has their subscription now get the benefit of the cheaper rate.

Advertising Rates: Furnished on application at the office, or by mail.

A. E. VOORHIES, PROP. & MGR. FRED MENSCH, EDITOR.

Entered at the post office at Grants Pass, Oregon, as second-class mail matter.

THURSDAY, APRIL 3, 1902.

W. J. Farish of Pendleton received the nomination for Governor at the Republican State Convention on Wednesday.

All fools day passed without special incident. It is pleasant to note that the silly pranks to which the day is supposed to give license are becoming fewer and fewer each succeeding year and this fact argues well for the increasing good sense of the human race.

Thomas H. Tongus was nominated by acclamation to succeed himself for congressman at the First congressional district convention held at Roseburg on Tuesday. The Second district convention held at Portland nominated J. N. Williamson of Prineville as congressman to succeed M. A. Moody.

President Roosevelt has taken a firm stand in vetoing desambling bills. Many desamblers have, by bills passed in congress, been restored to honorable standing and are then eligible to and receive pensions. The injustice of placing men like this on the same footing with those who have served their country faithfully is apparent to all. Roosevelt has said that he does not propose to have the records changed unless it meets the approval of the secretary of war.

Cecil Rhodes, "the uncrowned King of South Africa," is dead. He was one of the most remarkable men of his time, with an influence which affected the policies and destinies of nations. His name is commemorated in one of the South African provinces, Rhodesia. He left an enormous fortune, the larger amount of which is, by the terms of his will, to be used for the promotion of a vast educational scheme which was his pet project.

An unusual phase of controversy between mining and agricultural interests has occurred recently at Redding, Cal. The owners of an almond orchard laid an injunction against the Mountain Copper Co. of Keswick, restraining it from the present method of treating ores. The Mountain Copper Co. is one of the biggest mining concerns on the coast, paying out \$1,000,000 annually in wages and for supplies. The sulphur fumes from the smelter are extremely destructive to vegetable life and for miles around Keswick, the smaller tree growths are dead. Orchards are of course, heavy sufferers and the large interests involved make the matter one of gravity.

In the coming campaign and election, the Courier will be independent, as it has been heretofore. Our editorial support will be given, irrespective of party, to those candidates whom we think will best fill the offices for which they are nominated. While our editorial column will be reserved for the support of the candidates of our special choice, other columns will be open for such articles as candidates may wish published, and these will be charged for at regular advertising rates. This is a purely business proposition and we know of no reason why a candidate should not declare himself to the public through the medium of the press, as well as from the stump. These articles must approach a certain standard of fairness, moderation and courtesy. Mud slinging or vituperative communications are not wanted. Fairness demands that any candidate should have an opportunity of presenting himself to the voters and we think the arrangement we have announced will prove a satisfactory one.

The idea of reformatories is suggested in regard to dealing with the tramp evil. As they are more or less successful in dealing with other forms of fallen humanity, there is ground for believing that they would be good for tramps. No doubt there exists among the tramp fraternity many men of naturally good qualities who have merely abandoned themselves to drift aimlessly; who have "let go all holts." If any number of these could be reclaimed, humanity, nation and community would doubly gain by the transition. To uplift any class of humanity, a sympathetic interest is necessary and it has effect where sharp reproof or criticism merely aggravates the bad conditions. The tramp question is the more complex in that the members of the fraternity hypocritically prey on the sympathy and so out themselves off from a possible source of help. Trampism is a result of a seriously diseased mind and a cure by proper treatment might be effected in many cases. Especially is this true in the case of the younger tramps. If there is any chance of reclaiming any of them, the effort should be made.

### The Great Dismal Swamp

Of Virginia is a breeding ground of Malaria germs. So is low, wet or marshy ground everywhere. These germs cause weakness, chills and fever, aches in the bones and muscles, and may induce dangerous maladies. But Electric Bitters never fail to destroy them and cure malarial troubles. They will surely prevent typhoid. "We tried many remedies for Malaria and Stomach and Liver troubles," writes John Charlton, of Hinesville, O., "but never found anything as good as Electric Bitters." Try them, only 50c. Dr. Kramer guarantees satisfaction.

## FREE! FREE!

We are giving away to our customers some handsomely decorated, hand painted China with cash purchases. Buy your goods of us and get a

### Fine Set of Dishes

one or more at a time FREE.

We earnestly ask you to call and inspect it. You will surely want it.

## Red Star Store.

Front street, oppo Depot.

### Wilderville Items.

Spring weather since last writing. Go to C. Lorensen's hotel; cheapest and best in our city.

The "Easter" program was enjoyed by all who attended.

J. C. K. McCann was in Grants Pass on business one day last week.

Mr. Creel made a business trip to Grants Pass one day last week.

Mr. Chas. Smith, who has been sick for several weeks, is reported better.

The Epworth League met at the school house on Jerome Prairie last Sunday.

Rev. W. Rodgers preached at the Jerome Prairie school house Sunday, at 3 p.m.

Mr. and Mrs. Thompson moved the first of this week to the farm they have rented near New Hope.

Rev. F. Smith left Sunday for New Hope where he intends to preach, and then go to Medford to attend quarterly conference. He intends to be gone two or three weeks.

Raining a little at this writing.

ZANONI.

### Leland Sittings.

We have nice balmy weather, but the nights are cool. This retards gardening, as the ground is too cold to be favorable to vegetable growth.

We hear from Kinrossville of the first sickness that town has had. That horrible "grip" has made itself conspicuous again. G. W. Chapin has it and has been prostrated for several days.

### Grave Creek News.

(Omitted from last issue.)

Leland will soon lose one of her best citizens. We all regret to lose them but we wish them good luck wherever they locate.

The weather now is cool and cloudy but spring will soon be with us.

S. E. Pettinelli, our Gray merchant, visited Grants Pass one day last week.

Rev. Wm. Jordan preached at the Leland school house on Sunday last and will continue to hold services there the fourth Sunday in every month during this spring and summer. Some say that our school should soon begin but as we have no teacher how can it? What has become of Josephine county's teachers? We would like to hear from one of them.

"No, 'Job'" Salts did not succeed in finding the bungee on Tunnel 9 creek and has gone to Canada where they are more plentiful and expects to capture one for a pet.

C. H. Burton, of Placer was on the streets of Grants Pass one day last week. Despite his age C. H. is quite a lively old man.

Mr. Boyd says that he will soon be able to run the armoire. He has struck richer quarry lower down in his mine and thinks that he has good pay.

Miss Vivian Adams, of Leland, is visiting with friends at Grave Creek.

Mrs. Bentley, who has been very low with typhoid fever for the last three weeks, is slowly regaining her health again.

SAMMY.

During the past week we have opened up

## MANY NEW LINES OF SPRING GOODS

New Shirt Waists in White and Colors.  
New Silks for Waists and Trimmings.  
New White Goods, Embroideries and Laces.  
New Neckwear in Chiffon and Net Ruffs.  
Ties, Fancy Collars Etc.  
New Summer Corsets of Batiste, in Pink, Blue and White.  
New Kid Gloves in the latest shades  
New Umbrellas and Parasols in Black, White and Colors.  
New Walking Skirts.

We are showing a very pretty, up-to-date line of Wash Goods.

## E. C. DIXON

Shoes and Furnishing Goods

### Items From Greenback

W. A. Train returned from Roseburg on Saturday.

Easter Sunday passed off without the usual storm.

There is to be a social (All Fools) dance Tuesday night at the Greenback Hall.

Mr. and Mrs. Hampton, of Placer, attended the Easter services at our hall on Sunday evening.

Charles Wright is working on Jump-off Joe. His mother and sisters will soon move there to live with him.

Mrs. C. W. Thompson and little daughter are home from Portland for a short visit during the Easter vacation.

Mr. Jordan, of Clippie creek, C. S. today a crowd of Mr. King was here for a few days, then went to Williams creek.

The Easter vacation went very nice. The "The Holy City" was well rendered by Mr. Gray, and was appreciated by a large congregation. There will be services again at the hall next Saturday evening.

Some of the young folks attended the side show at Placer on Friday night. They must have enjoyed it highly as some of them wanted to speak of it. Some of them regret that they were unable to purchase the musical numbers that were rendered.

Mrs. L. Ellis returned from California where she has been spending the winter. Mr. E. is wearing a broad smile. He says his own cooking does not agree with him, and we judge it must be so as it gets quite thin during her absence but he is slowly gaining his usual health.

C. A. Rohrbacher, general traveling

### ORIGIN OF THE CAMEL

#### Clews Supplied by Fossils Found in Arctic and Tropics.

Animals That Could Endure the Greatest Extremes of Cold as Well as Heat—Some Species of the Gobi Desert.

Many people think of the camel as practically a tropical animal, perhaps because some of its most striking characteristics fit it for crossing the desert of Sahara. Its large storage of water and the insensative sides of its feet naturally suggest life near the equator. Even the domesticated camels of Asia, whether of the Persian, Arabian-African species, which has but one hump, or those of Bactrian origin, which are endowed with two, perform most of their service in what is, after all, a pretty hot climate, says the New York Tribune.

However, in a recent number of "Globe" Dr. Nehring, of Berlin, lays stress on the fact that the Bactrian camel is sometimes found in Siberia, and can endure the greatest-known extremes of cold as well as those of heat, if the air is only dry. In the winter temperatures are considerably lower than here, and are often 40 and 50 degrees below that point. The habit of the camel here overtops that of the reindeer! Yet in the Gobi desert in Turkestan, animals of the same species have occasion to trot over earth whose temperature at times rises to 120 and 140 degrees Fahrenheit.

There has been much speculation concerning the origin of the old world camel. Bactria, the little kingdom which gives its name to the two-humped animal, lies only a little north of Afghanistan. And, inasmuch as recovered in the tertiary rocks of the Swalk hills in northern Hindostan, it has been supposed that this was the birthplace of the race. But Dr. Nehring points out the equipment of teeth—some of the most valuable clews in tracing geological eras. It remains to be seen if the fossil remains of the camel in the Swalk hills in northern Hindostan, it has been supposed that this was the birthplace of the race. But Dr. Nehring points out the equipment of teeth—some of the most valuable clews in tracing geological eras.
